# HSHSL Classroom 331

# Quick Start Guide

# To Begin:

- **Touch anywhere on the screen**

- The touch screen will take you to a new page. You will then select **Presentation** where you will select your preferences (see next page).

- To turn off all devices please select **System Shutdown**.
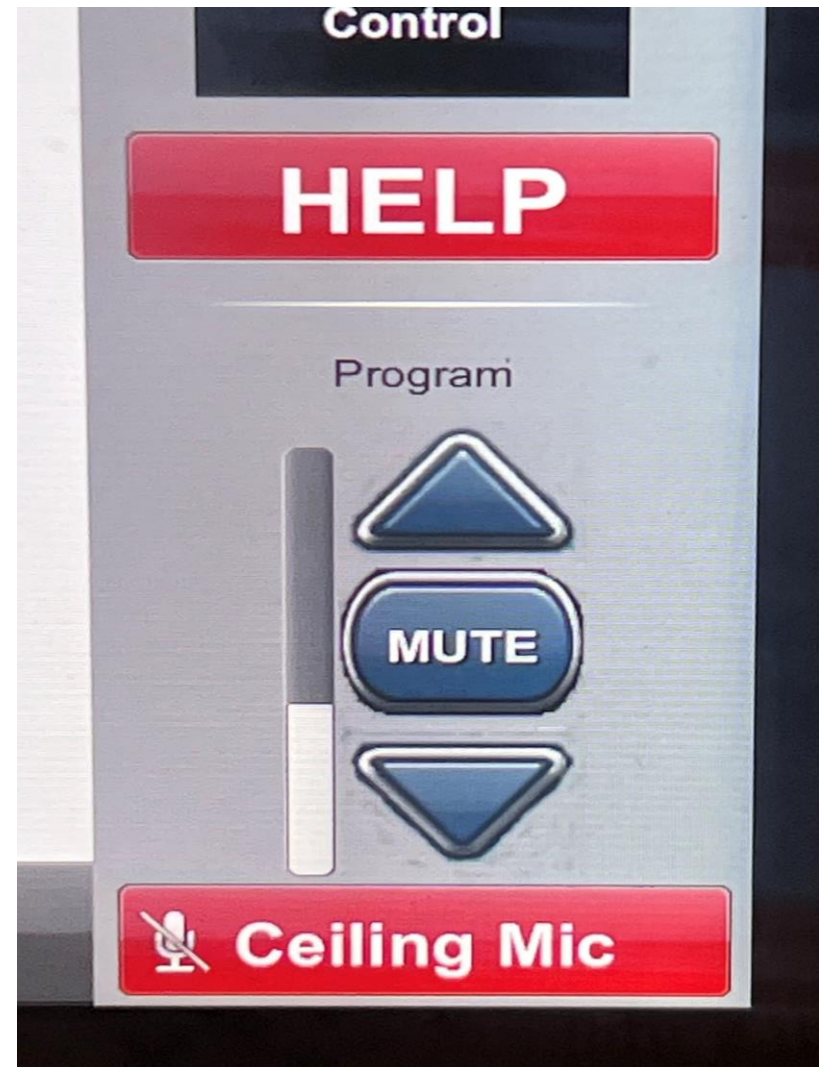

# Presentation Options:

- You have the option to select from a **PC, Laptop,** or **Wireless**
  - Wireless instructions are on Pgs 5 & 6
  - Camera is not an option.  It is a program setting for the cameras in the room which should not be adjusted.

- Each option can be routed to either of the displays by selecting, for example, PC then selecting Display 1 or 2.

- Once you select your desired option it will be show on the in-room displays mounted on the wall.

3

# Program Volume:

**Program Volume** controls the overall sound from the devices.

- The microphones in the room are digitally set are not designed to make the speaker louder inside the room.

- The microphones are for video conferencing and are sensitive.

- The microphones can be muted. When they are muted, the lights on the ceiling microphones will go from green to red. Unmuting will switch the microphones back to red to green.   The button on the wall unit will also switch colors.

# Using Wireless Laptop Connection

- Select **Wireless** on wall touch panel (Pg. 3).

  - Select Display 1 and/or Display 2

- Type the IP address you see under "**Internal Access**" on your laptop

- If you are taken to "**Your Connection is not Private**" page, scroll down and select "**Proceed to (Current IP address) (unsafe)**
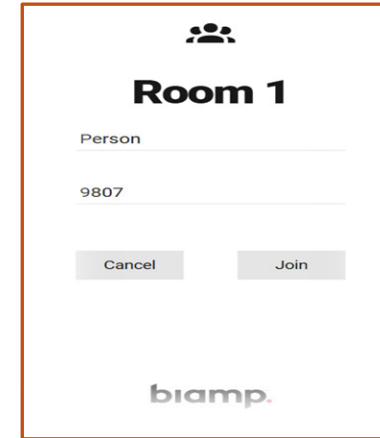

**Note:** To use this device, the user must be able to access UMB Wi-Fi Eduroam or the device will not connect. Turn off any VPNs you may be logged into. The wireless input is not connected to in-room cameras.
